A little bit more about me

Personally, I am a persistent, creative, happy and a
little hurried person who is always motivated to learn
new things, I like helping people, I like swimming in
sports and I like things that help alleviate poverty...

o **PWA**

o **CI/CD**
o **WebStorage**

o **Figma/Zeplin**

Work experience

Digikala [frontend developer] Digikala, the largest online marketplace and store in Iran, based in Tehran, which receives more than 5.4 million daily visitors. Develop, code review and collaborate with colleagues on multiple projects. We were using different technologies to build our platform needs. We also did some refactoring on old projects to bring them into new age applications. (Apr 2021 - present)

SnappMarket [frontend developer] Snapp is the biggest IT company in Iran I was a frontend developer here and helped SnappMarket to grow and improve the old PWA application in many aspects like rendering perfo--rmance, code quality, business logic handling and UI Improvements. Then we started making the new website(the already live one) we created some re-usable open-source packages publish them on NPM and GitHub. (Oct 2019 - Feb 2021)

Chilivery [frontend developer] I worked at Chilivery, an online food ordering site. My effort was to create a good experience for the user, for which I used technologies such as JavaScript, jquery, sass and less.

(Mar 2017 - Sep 2019)

Netbarg [frontend developer] Netbarg is a discount and group shopping site which is a well-known company in Iran.
I started my work as a frontend developer here and helped Netbarg to make the new website application in many aspects like rendering performance, code quality, business logic handling, and UI Improve--ments. (Jun 2016 - Sep 2019)
