- **B.A** Computer Engineering, PayameNoor university (Graduated)
- **M.A** Computer Engineering, K.N Toosi university (Withdrawal)

Work Experience:

- **SoftConstruct**, Frontend Team Lead (Jan. 2021 - present)

  We were working on a AI based intelligent chatbox called Hoory. I was Leading an eight members team. We were using React.js, redux, metarepos, k8s, gcp, gRPC, and lots of edge technologies.

- **SnappMarket**, Frontend Engineer (Sep. 2019 - Jan. 2021)

  SnappMarket is biggest Iranian online grocery. I made a brand new structure and standard to develop front-end apps there. Also, I built the new website with react.js and SSR.

- **TorfehNegar**, Fullstack Developer (Sep. 2017 - Jan. 2019)

  Holoo is a well-known accounting app in Iran and we were building a web version of this app with zf2. Also, we made internal projects with nodejs, MongoDB, and react.js. We had daily challenges with large scale apps made in this company.

- **Idea Pardazane Hamrah**, Founder (Apr. 2016 - Aug. 2019)

  This was my own company to work on my startups, including Jurchin and Citygram projects. Also, we worked on freelance projects.

- **Province ICT Org**, Secretary of Software council (Apr. 2011- May. 2016)

  We were managing Ardabil Province software-related stuff by having weekly meetings and fixing problems.

- **Freelance**, Designer and Developer (Apr. 2011 - May. 2016)

  Graphic design, Template Develop and simple backend projects.

A little bit more about me

Personally, I am a persistent, creative, happy and a little hurried person who is always motivated to learn new things, I like helping people, I like swimming in sports and I like things that help alleviate poverty...
